

MPAS Development as of December 06, 2024

Software:

What's Changed

- **User Account:** Updated: Count only owned vessels; public vessels that are not owned are not counted.
- **User Account:** Updated message and logout button in profile View
- **User Account:** Added MPA Name on map in dashboard, Route, Vessel View
- **User Account:** List of all the scheduled routes for both public and owned vessels
- **User Account:** Date picker for scheduled routes both public and owned vessels
- **User Account:** Allow only to pick Date picker that has scheduled routes

Changelog Images: https://drive.google.com/drive/folders/1GsAPYW3NU3JBrfYy2AVIERvZMmNcWyTk?usp=drive_link

Why does this matter?

With this upgrade, users may now determine if a vessel has route schedule. These improvements offer two primary advantages to the user:

1. A passenger ship or vessel owner will have a simple way to tell people about their ship and its route.
2. Now, a user or passenger can learn the basic timetable of all public vessel, which will help them plan their trips to various locations.
