  - **Saving Vessel coordinates for tracking purposes**
  - **Sending Data to vessel owner for SOS response.**

Changelog Images: https://drive.google.com/drive/folders/1EHVAOx3WChEpVAaxHaoMRSMHsXNOg49E?usp=drive_link

Why does this matter?

With this upgrade, the administrator may now be able to see the current status of the vessel. Not just its coordinates but also the signals of the communication module used in transmitting data.

Hardware:

What's Changed

- Updated Firmware for sending data:
  - A new field (SOS Signal, Response Signal, etc..) was added to be communicated to the station
  - New transmitted data format
